

Flowchart/Code for Examples part1

Wednesday, October 19, 2022 4:41 PM

(General) test3

Option Explicit

'How would you make a vba sub that would take a value
'from an input box and:

'Display the square root in a msg box

```
Sub SquareRoot()  
Dim x As Double, y As Double  
x = InputBox("Enter a number:")  
y = Sqr(x)  
MsgBox ("The square root of " & x & " is " & y & ".")  
End Sub
```

'Display the square root in the active cell

```
Sub SquareRoot2()  
Dim x As Double, y As Double  
x = InputBox("Enter a number:")  
y = Sqr(x)  
ActiveCell = FormatNumber(y, 2)  
End Sub
```

'Display the square root in c3

```
Sub SquareRoot3()  
Dim x As Double, y As Double  
x = InputBox("Enter a number:")  
y = Sqr(x)  
Range("C3") = FormatNumber(y, 2)  
End Sub
```

'Example2: How would you make a vba sub that would take the
'value in cell A1 and:

'Display the square root in a msgbox

```
Sub SquareRoot4()  
Dim x As Double, y As Double  
x = Range("A1")  
y = Sqr(x)  
MsgBox ("The square root of " & x & " is " & y & ".")  
End Sub
```

'Display the square root in the active cell?

```
Sub SquareRoot5()  
Dim x As Double, y As Double  
x = Range("A1")  
y = Sqr(x)  
ActiveCell = FormatNumber(y, 2)  
End Sub
```

'Display the square root in cell C3?

```
Sub SquareRoot6()  
Dim x As Double, y As Double  
x = Range("A1")  
y = Sqr(x)  
Range("C3") = FormatNumber(y, 2)  
End Sub
```

'Given the spreadsheet setup shown, what value is displayed in the
'message box when the WhatHappens subroutine is executed and the user
'inputs 4 into the input box?

```
Sub test()  
MsgBox Range("b2:d3").Count  
'count # of cells in this region 6  
End Sub
```

```
Sub test2()  
MsgBox Range("b2:d3").Count * ActiveCell  
' 6 * -4 = -24  
End Sub
```

```
Sub test3()  
'cells counts 5 rows down and two col to the right which is  
'B5=7  
MsgBox Cells(5, 2)  
End Sub
```

```
Sub test4()  
MsgBox Range("b2:d3").Count * ActiveCell + Cells(5, 2)  
' 6 * -4 + 7 = -17  
End Sub
```

```
Sub WhatHappens()  
'Question says user enters 4 so  
' 6 * -4 + 7 * 4 = 4  
MsgBox Range("b2:d3").Count * ActiveCell + Cells(5, 2) * InputBox("Enter a number:")  
End Sub
```
