

# Learning Objectives

Wednesday, October 19, 2022 4:26 PM

- **Week 4 begins the "meat" of programming in VBA, and we are finally moving into some exciting problem solving. You will learn about the common programming structures in VBA (sequence, selection, and repetition) that form the foundation for advanced programming procedures. Several examples will highlight the utility of these programming structures.**
- **Learning Objectives**
- **Use the programming structures for selection and repetition in VBA code.**
- **Implement code that will validate user input.**
- **Create advanced subroutines and functions that use selection and repetition.**
- **Iterate through vectors using For...Next loops.**
-
